# Solomon Charles

# Social Impact and Placemaking Specialist

BA(Hons) Human Geography, The University of Melbourne

Peckham, London sol.cha13@gmail.com +44 7722 170711

I am an experienced researcher specialising in the sustainability of cities through the lenses of community impact, social inequality, and cultural vibrancy. Recently, I have served as a key analyst on flagship social and economic research projects for the NSW Government, local councils, and private sector clients. My strengths include creative problem-solving, social research, demographic analysis, and effective communication skills.

## Recent history and skills

#### Ethos Urban

Senior Consultant, Social Strategy

February 2023 – July 2025, Melbourne / Sydney

- Well versed in conducting social impact assessments (SIA) using the International Association of Impact Assessments (IAIA) framework
- Project management experience, delivering community impact projects for clients including School Infrastructure NSW, the Office of the 24-Hour Economy Commissioner, and Mirvac
- Accomplished in delivering face-to-face community engagement activities amongst diverse cohorts
- Collaboration with state and local governments to deliver strategic policy research
- Moderate proficiency using spatial data software (QGIS)
- Data driven demographic analysis and social research, including end-to-end design and analysis of mixed methods (quantitative and quantitative) studies

#### The University of Melbourne

Junior Academic Research Assistant, School of Anthropology and Development Studies

March 2022 - February 2023, Melbourne

- Maintain strong and productive relationships with senior academic supervisors
- Undertake in-depth academic literature reviews within the social sciences.

#### Recent Project highlights:

- Sound NSW Live Music Census, NSW: A first of its kind social and
  economic research project for NSW, examining the live music
  industry's contribution to the State economy, strengths, barriers,
  and opportunities to increase its social and cultural impacts. I was
  the project's lead Social Strategy analyst, engaging in primary
  research activities and co-designing social analysis approaches.
- Harborside Green Star Community Resilience Plan, NSW: I contributed to the development of a community resilience framework for Mirvac to help them achieve LEED certification in social sustainability. I undertook a review of academic literature as well as international, state and local policies to inform the project's community resilience framework. This involved developing recommendations to shape development outcomes around strengthening social bonds between future residents of the development to increase community resilience through shared social capital networks.
- City of Newcastle Affordable and Diverse Housing Investigation,
   NSW: I collaborated with stakeholders across the NSW housing
   sector through workshops to build and understanding of key
   constraints and opportunities for affordable housing delivery in
   Newcastle. This informed Council's short- and long-term strategic
   planning frameworks to deliver diverse and affordable housing
   across the Local Government Area
- Merri-bek Sports Surface Study and Decision-Making Framework,
   VIC: I contributed to the design of a strategic framework to support
   Council to make decisions in the use and development of synthetic
   sports surfaces versus natural turf across their community assets.
   This was informed by in-depth research piece to support the
   framework's integrity under community scrutiny. We developed a
   tool kit to evaluate.
- Sydney Football Stadium Community Engagement and Social Impact Management. NSW: I contributed to the ongoing community engagement program established to manage the social impacts of large-scale events on the stadium site's neighbouring community. This involved bi-annual consultation and reporting to satisfy to project's State Significant Development Application conditions of consent.
- Research into community support networks as related to COVID-19
   Pandemic Response: As a research assistant at University of
   Melbourne, Parkville in the School of Anthropology and
   Development Studies, I undertook research focusing on aid and
   community support networks between faith based organisations within minority communities in low-income and
   public housing contexts, analysing community responses to the
   COIVD-19 Pandemic.
